

Hanging Ice Decorations

You will need:

- water
- plastic or flexible vessels - cups, bowls, tubs, yoghurt pots
- string
- natural materials

1. Fill your pots with water.

Why not mix it up and add some natural materials to your water? You could add berries, leaves, or even a small toy!

2. Place a loop of string or wool in the pot so both ends are in the water.

3. Leave the pots outside to freeze.

4. Once frozen, push your decoration out of the pot.

5. Use the loop to hang your decoration somewhere you can see it.

How long does it take to melt?

Please do share your work with us on our Facebook page - we would love to see what you've been up to!
